WORK EXPERIENCE

PT. BUMI BENING BERKARYA | SOFTWARE ENGINEER

MARCH 2025 - PRESENT

- Developed enterprise maintenance, inventory, procurement, and reporting systems using Python (Flask), PHP (Laravel), and PostgreSQL following MVC architecture.
- Designed and implemented RESTful APIs for system integration with internal and external services.
- Built responsive dashboards and internal management systems.
- Designed and optimized SQL databases by improving complex SQL queries and indexing for better performance.
- Developed workflow automation including approval systems, document generation, reporting, and scheduled background jobs.
- Implemented authentication, role-based access control (RBAC), and permission management.
- Built inventory, procurement, maintenance, and reporting modules for enterprise operations.
- Collaborated with cross-functional teams to gather requirements, fix production issues, and deliver new features using Git-based workflows.

CAREER TRANSITION

MARCH 2024 - FEBRUARY 2025

- Transitioned from Sales Administration to Software Engineering through intensive self-learning and hands-on development projects.
- Built multiple web applications using Laravel, mySQL, and JavaScript.
- Applied knowledge of business processes to develop practical enterprise software solutions.
- Continuously improved programming skills by learning backend development, database design, REST APIs, and MVC architecture.
